4 TOP GRASSES

THE FOREFRONT OF HIGH FEEDING QUALITY

STRIDE

- 🌿 Tetraploid Perennial Ryegrass
- 🌿 Maturing Date: Intermediate
- 🌿 High Digestibility of Cell Wall
- 🌿 Top Yielding
- 🌿 Healthy and Persistent
- 🌿 Very Palatable
- 🌿 High Sugar Content
- 🌿 Medium to High DM
- 🌿 Can be custom mixed to your specifications
- 🌿 Seed Treating options available

ALGIRA

- 🌿 Tetraploid Perennial Ryegrass
- 🌿 Maturing Date Early-Mid
- 🌿 High Winter Hardiness
- 🌿 High Digestibility of Cell Wall
- 🌿 Top Yielding
- 🌿 Healthy and Persistent
- 🌿 Very Palatable
- 🌿 High Sugar Content
- 🌿 Medium to High DM
- 🌿 Can be custom mixed to your specifications
- 🌿 Seed Treating options available

DOMINATE

- 🌿 Tetraploid Annual Ryegrass
- 🌿 Very High DM
- 🌿 Maturity Date early to intermediate
- 🌿 Excellent for silage production
- 🌿 Ideal cultivar to sow between maize and other crops
- 🌿 Fast growing
- 🌿 Proven Yields
- 🌿 Outstanding winter crop
- 🌿 High sugar content, palatable forage

Profit through better nutrition **DOMINATE™ RYEGRASS**

With changes happening in the farming industry, costs rising and incomes not keeping pace, it is good news to have a new variety of ryegrass released on the market that is giving farmers the advantage they need.

DOMINATE RYEGRASS is a well trialled variety that is achieving outstanding results with high sugar levels of 18-20%+, ME 11.5-13, protein 25% and Dry Matter yields which have recorded very high, over two heavy cuts in the spring.

DOMINATE is specially selected from a European variety grown in New Zealand that is setting new benchmarks for ryegrass pastures.
